Saahil Doshi	AU2140106
Jash Parikh	AU2140108

Project 8: Athlete performance in collegiate basketball: Predicting match line-up (Visualization on Dashboard)

Week 1: Understanding Project Definition

Accomplishments:

- Comprehensive review of the project's problem statement and objectives.
- Discussed and clarified the scope of the project with team members.
- Identified key components of the project, including data sources, prediction targets, and desired outcomes.
- Established a clear understanding of the tasks and milestones for the upcoming weeks.

Challenges:

- Clarifying certain aspects of the project requirements and objectives.
- Aligning team members' understanding of the project goals and expectations.
- Identifying potential risks and uncertainties in the project timeline and scope.

Next Steps:

- Refine the project definition and objectives based on the insights gained.
- Begin planning for literature review to explore relevant research papers and methodologies.
- Coordinate with team members to allocate tasks and responsibilities.
